

1. All shaders are created using the ASE (Amplify Shader Editor) tool.

2. By default, the assets are designed for the URP pipeline. If you need to use them with the Built-in pipeline, please double-click the "Built-in" folder to replace all asset files accordingly.

Notes:

This asset only includes the files and does not come with modification services.

If you need custom VFX, please email me:
sacukgina@gmail.com.
